

ROOF STORM DAMAGE CHECKLIST

Completely Custom Roofing is a trusted professional roofing contractor here to help you with roof damage assessment and repair for your home. We offer free inspections and will assist you with insurance claims to help reduce the stress and financial burden. Use this checklist to help get you started.

☐ **ROOF**

Walk around the perimeter of your house and visually assess the state of your roof. Take note of any visible storm damage. Keep notes and take photos to potentially help later when/if filing an insurance claim. You are looking for any visible signs of storm damage such as dented, torn, curled, or missing shingles.

☐ **GUTTERS, VENTS, AND WINDOWS**

Check for dents on your gutters and roofing accessories (gable vents and overhangs). Inspect windows for cracks, broken glass, loose weather stripping, and torn screens.

☐ **OUTSIDE AREAS**

Walk around your homes exterior and check for fallen tree limbs, missing fence posts, or damage to outdoor furniture and decorations.

☐ **ATTIC AND CEILINGS**

Check ceilings and attic/crawlspaces for leaks and water spots. While your roof may appear undamaged on the outside, wind and hail can cause unseen leaks that could lead to larger problems down the road.

☐ **CALL YOUR HOMEOWNERS INSURANCE PROVIDER**

It is important to involve your homeowners insurance provider right away so you can properly file a claim based on their requirement. Once you have determined you have storm damage and reviewed your policy, call your insurance provider to confirm coverage and open a claim.

☐ **HIRE A DEPENDABLE, TRUSTED ROOFING CONTRACTOR**

Contact Completely Custom Roofing to assess the damage, draft an estimate and provide the required documentation to your insurance provider. Once a decision is made by the insurance adjuster, we will work with you to schedule the job.
